Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Part III Accountant's Opinion

3 Complete lines 3a through 3c if the opinion of an independent qualified public accountant is attached to this Form 5500. Complete line 3d if an opinion is not attached.

a The attached opinion of an independent qualified public accountant for this plan is (see instructions):

(1) Unmodified (2) Qualified (3) Disclaimer (4) Adverse

b Check the appropriate box(es) to indicate whether the IQPA performed an ERISA section 103(a)(3)(C) audit. Check both boxes (1) and (2) if the audit was performed pursuant to both 29 CFR 2520.103-8 and 29 CFR 2520.103-12(d). Check box (3) if pursuant to neither.

(1) DOL Regulation 2520.103-8 (2) DOL Regulation 2520.103-12(d) (3) neither DOL Regulation 2520.103-8 nor DOL Regulation 2520.103-12(d).

c Enter the name and EIN of the accountant (or accounting firm) below:

(1) Name: **BDO USA, P.C.**

(2) EIN: **13-5381590**

d The opinion of an independent qualified public accountant is **not attached** as part of Schedule H because:

(1) This form is filed for a CCT, PSA, DCG or MTIA. (2) It will be attached to the next Form 5500 pursuant to 29 CFR 2520.104-50.

Part IV Compliance Questions

4 CCTs and PSAs do not complete Part IV. MTIAs, 103-12 IEs, and GIAs do not complete lines 4a, 4e, 4f, 4g, 4h, 4k, 4m, 4n, or 5. 103-12 IEs also do not complete lines 4j and 4l. MTIAs also do not complete line 4l. DCGs do not complete lines 4e, 4f, 4k, 4l, and 5, and DCGs generally complete the rest of Part IV collectively for all plans in the DCG, except as otherwise provided (see instructions).

During the plan year:

- a** Was there a failure to transmit to the plan any participant contributions within the time period described in 29 CFR 2510.3-102? Continue to answer "Yes" for any prior year failures until fully corrected. (See instructions and DOL's Voluntary Fiduciary Correction Program.)
- b** Were any loans by the plan or fixed income obligations due the plan in default as of the close of the plan year or classified during the year as uncollectible? Disregard participant loans secured by participant's account balance. (Attach Schedule G (Form 5500) Part I if "Yes" is checked.)......

Independent Auditor's Report

The Plan Administrator
Ford Motor Company Defined Benefit Plans
Dearborn, Michigan

Opinion

We have audited the financial statements of Ford Motor Company General Retirement Plan, Ford Motor Company UAW Retirement Plan, and UAW-AAI Retirement Plan (collectively, the Plans), employee benefit plans subject to the Employee Retirement Income Security Act of 1974 (ERISA). The financial statements comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of the Plans as of December 31, 2024 and 2023, and the changes in their net assets available for benefits for the years then ended in accordance with accounting principles generally accepted in the United States of America (GAAP).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are required to be independent of the Plans and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with GAAP, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plans' ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Management is responsible for maintaining a current plan instruments, including all plan amendments. Management is also responsible for administering the Plans and determining that the Plans' transactions that are presented and disclosed in the financial statements are in conformity with the Plans' provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

BDO USA, P.C., a Virginia professional corporation, is the U.S. member of BDO International Limited, a UK company limited by guarantee, and forms part of the international BDO network of independent member firms.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if, there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plans' internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plans' abilities to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Ford Motor Company Defined Benefit Plans
(Ford Motor Company General Retirement Plan,
Ford Motor Company UAW Retirement Plan, and UAW-AAI Retirement Plan)

Notes to Combining Financial Statements

1. Description of the Plans

The following brief description of Ford Motor Company General Retirement Plan (GRP), Ford Motor Company UAW Retirement Plan (UAW Plan), and UAW-AAI Retirement Plan (UAW-AAI Plan) (collectively, the Plans) is provided for general information purposes. The provisions of the Plans are governed in all respects by the detailed terms and conditions contained in the respective Plan documents. Participants should refer to the Plan documents for the complete information. The Plans are subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). The Plans are administered by Ford Motor Company.

General

The GRP is a defined benefit plan of the unit-benefit type and pay-related type that provides noncontributory and contributory retirement income to member employees. The GRP covers all salaried employees and hourly employees of Ford Motor Company and participating subsidiaries (collectively, the Company or Ford) who are not represented under the collective bargaining agreement between Ford and the International Union, United Automobile, Aerospace, and Agricultural Implement Workers of America (UAW). Noncontributory membership in the GRP commences after three months of continuous service; contributory membership commences at the employee's election after attaining noncontributory membership.

Effective January 1, 2004, the Company's board of directors approved the introduction of a defined contribution plan as the primary retirement program for new salaried employees, replacing the GRP. All Ford (including participating subsidiaries) salaried employees hired or rehired on or after January 1, 2004 will participate in the new defined contribution plan. All salaried employees hired or rehired prior to January 1, 2004 will continue to participate in the GRP.

The GRP is supported by Company and employee contributions. Neither the Company's contributions nor the Plan assets are allocated for the accounts of individuals; however, records of individual employee contributions are maintained. A contributing member's monthly contribution is equal to 1.5% of total monthly base salary (up to the legally required annual compensation limit) and is fully and immediately vested. A contributing member may suspend the making of contributions at any time. If the member suspends contributions, the member may not again commence making contributions until at least one year after the effective date of such suspension.

The UAW Plan is a defined benefit plan of the unit-benefit type that provides noncontributory retirement income to member employees. The UAW Plan covers all hourly employees represented under the Ford-UAW agreement and hired or rehired by Ford prior to November 19, 2007, and all direct-hire skilled trade employees hired prior to October 24, 2011. Membership in the UAW Plan commences on the date of hire.

The UAW Plan is supported by Company contributions. Neither the Company's contributions nor the Plan assets of the UAW Plan are allocated for the accounts of individuals.

AutoAlliance International, Inc. (AAI) adopted the UAW-AAI Plan, a defined benefit cash balance pension plan, to provide pension benefits to substantially all hourly AAI employees hired prior to March 24, 1997.

Ford Motor Company Defined Benefit Plans
(Ford Motor Company General Retirement Plan,
Ford Motor Company UAW Retirement Plan, and UAW-AAI Retirement Plan)

Notes to Combining Financial Statements

On February 28, 1997, AAI entered into an agreement with Ford under which AAI agreed to transfer its employees represented by the UAW (AAI Services participants) to AAI Employee Services Company L.L.C. (AAI Services), a wholly owned subsidiary of Ford. As part of the agreement, effective March 24, 1997, AAI Services participants stopped accruing service under the UAW-AAI Plan and commenced accruing service under the UAW Plan for purposes of determining benefits; however, AAI Services participants continued to accrue service under the UAW-AAI Plan after March 24, 1997 for purposes of determining eligibility, including eligibility for additional supplements. Additionally, AAI Services participants became fully vested in their UAW-AAI Plan benefits effective March 24, 1997 and continued to accrue interest thereafter on their UAW-AAI Plan account balances. Funding of the UAW-AAI Plan has continued as required.

The Company contributes such amounts as are necessary on an actuarial basis to provide the Plans with assets sufficient to meet the benefits to be paid to the Plans' members (see Note 4). The UAW Plan and the UAW-AAI Plan provide that participants are not allowed to make contributions.

Pension Benefits

Under the GRP, noncontributory and contributory life income benefits are payable upon normal retirement at age 65 or upon early or disability retirement. Spouse survivorship benefits are included as part of the GRP. Early retirement supplements and temporary benefits are generally payable to age 62 and one month. Qualification to receive a benefit is dependent upon meeting certain eligibility requirements. If a nonvested employee who has made contributions to the GRP terminates employment, the participant will receive a payment equal to the employee's accumulated contributions plus interest of 120% of the federal midterm rate (5.25% and 4.62% for 2024 and 2023, respectively) compounded annually.

Under the UAW Plan, life income benefits are payable upon normal retirement at age 65 or upon early or disability retirement. Spouse survivorship benefits are included as part of the UAW Plan. Early retirement supplements and temporary benefits are generally payable to age 62 and one month. Qualification to receive a benefit is dependent upon meeting certain eligibility requirements.

Under the GRP and the UAW Plan, life income benefits vest after five years of credited service or ERISA service, or when the members become eligible for normal retirement. Early retirement supplements are dependent upon meeting certain eligibility requirements in addition to vesting. Although entitlement to these supplements is uncertain for nonretired employees, the value of these benefits was included, for reporting purposes, in the vested benefits section of the accumulated plan benefits in Note 5.

Under the UAW-AAI Plan, Plan participants with five or more years of service are entitled to monthly pension benefits based on the greater of the value of their account balance or the minimum monthly benefit as set forth in the UAW-AAI Plan, beginning at normal retirement age (65) or upon early retirement. The account balance is the accumulation of annual credits based on average salary and the Social Security taxable wage base, adjusted for the greater of the 30-year Treasury bond yield or 4%. Early retirement supplements are generally payable to age 62 and one month.

Participants under the UAW-AAI Plan and the GRP may elect to receive their pension benefits in the form of an annuity, a joint and survivor annuity, or a lump sum. Participants of the UAW Plan can elect to receive their pension benefit in the form of an annuity or a joint and survivor annuity.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying combining financial statements are prepared on the accrual basis of accounting.

Investment in Master Trust

The Plans participate in the Ford Motor Company Master Trust Fund (the Master Trust), whose trustee is The Northern Trust Company (Northern Trust). The Master Trust investment accounts are valued at the end of the month based on the fair value of underlying assets. Purchases and sales of the Master Trust investment account securities are reflected on a trade-date basis. Gains and losses on sales of securities are based on average costs. Net appreciation (depreciation) includes the Plans' gains and losses on investments bought and sold as well as held during the year.

Dividend income of the investment accounts is recorded on the ex-dividend date. Income from other investments of the Master Trust investment accounts is recorded as earned on an accrual basis.

The total (memorandum only) columns in the accompanying combining statements of net assets available for benefits and combining statements of changes in net assets available for benefits represent the total balances and activity for the Plans currently participating in the Master Trust and are provided for information purposes only.

Investment Valuation

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Investments in the Master Trust are stated at fair value. If available, quoted market prices are used to value investments. When quoted market prices are not available, various valuation techniques are utilized and observable inputs are prioritized to determine fair value. The use of different market assumptions and/or different valuation techniques may have a material effect on the estimated fair value amounts. See Note 6 for additional information.

Payment of Benefits

Benefit payments are recognized as a reduction to net assets of the Plans when paid. Benefits to participants, which have been approved but not processed, were \$8,025,913 and \$269,991 as of December 31, 2024 and 2023, respectively, for the GRP; \$338,697 and \$799,322 as of December 31, 2024 and 2023, respectively, for the UAW Plan; and \$0 and \$1,153 as of December 31, 2024 and 2023, respectively, for the UAW-AAI Plan.

Plan Expenses

Costs of administering the Plans are paid by the Plans. Certain other costs are paid by the Company. Pension Benefit Guaranty Corporation (PBGC) insurance premiums and disability retirement medical examination fees are also paid by the Plans. Certain expenses, such as investment manager and trustee fees, are paid by the Master Trust and charged to the Plans based upon the Plans' proportionate interest in the net assets of the Master Trust. Total expenses paid by the Master Trust were approximately \$100 million and \$95 million for the years ended December 31, 2024 and 2023, respectively.

Ford Motor Company Defined Benefit Plans
(Ford Motor Company General Retirement Plan,
Ford Motor Company UAW Retirement Plan, and UAW-AAI Retirement Plan)

Notes to Combining Financial Statements

The Company is reimbursed by the Plans for certain administrative expenses it directly incurs in the operation of the Plans. For the years ended December 31, 2024 and 2023, these expenses were approximately \$0.8 million and \$0.7 million, respectively, each year for the GRP and approximately \$2.0 million and \$1.7 million, respectively, for the UAW Plan. The Company did not require reimbursement from the UAW-AAI Plan for any administrative expenses for the years ended December 31, 2024 and 2023. Certain expenses related to the Plans are paid by the Company and not reimbursed by the Plans.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets, liabilities, and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements and changes therein. Actual results could differ from these estimates.

Subsequent Events

The combining financial statements and related disclosures include evaluation of events up through and including October 3, 2025, which is the date the combining financial statements were available to be issued. There were no subsequent events requiring adjustments to or disclosure in the combining financial statements.

3. Risks and Uncertainties

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain economic and demographic assumptions, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Investment securities within the Master Trust are exposed to various risks, such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is at least reasonably possible that changes in these risks, estimates, and assumptions in the near term could materially affect the amounts reported in the combining financial statements.

4. Funding Policies

Employer contributions are determined by an independent actuary, Willis Towers Watson, and represent the annual amount required by ERISA to meet the minimum funding standards. These contributions are funded on or before the required dates as set forth by ERISA. The Plans met the ERISA minimum funding requirements for 2024 and 2023. The Company at its option can contribute more than the minimum required. Subsequent to December 31, 2024 and 2023, the Company contributed \$541 million and \$647 million to the GRP, respectively. Subsequent to December 31, 2024 and 2023, the Company contributed \$5 million and \$3 million to the UAW-AAI Plan, respectively. The contributions were recognized during the December 31, 2024 and 2023 Plan years, respectively, and are reflected as employer contributions receivable in the combining statements of net assets available for benefits.

**Ford Motor Company Defined Benefit Plans
(Ford Motor Company General Retirement Plan,
Ford Motor Company UAW Retirement Plan, and UAW-AAI Retirement Plan)**

Notes to Combining Financial Statements

Current and prior service is funded as required and funding amounts are subject to tax deductibility and full funding limitations. Prior service installments represent the amortization of funding liability shortfalls over periods of not more than seven years from the date such shortfalls are established.

Employee contributions are not permitted under the UAW Plan and the UAW-AAI Plan.

Under the GRP, employee contributions are recorded in the same period the Company withholds payroll deductions from GRP participants. Accumulated contributions of current employees at January 1, 2024 and 2023 were approximately \$288 million and \$278 million, respectively, including interest credited at an interest rate, compounded annually, equal to 120% of the federal mid-term rate in effect the first month of each calendar year.

5. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic and lump-sum payments that are attributable under the Plans' provisions and the current collective bargaining agreement, if applicable, to the service employees have rendered to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. The accumulated plan benefits for active employees will equal the accumulation, with interest, of the annual benefit accruals as of the benefit information date. Benefits payable under all circumstances—retirement, death, disability, and termination of employment—are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an independent actuary by applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

Notes to Combining Financial Statements

The foregoing actuarial assumptions are based on the Plans continuing indefinitely. If any of the Plans were terminated, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits of the respective terminated plan. The computations of the actuarial present value of accumulated plan benefits were made as of January 1, 2024. Had the valuation been performed as of December 31, there would be no material differences.

Actuarial assumptions used are based generally on the Plans' experience, and the reasonableness of such assumptions is evaluated on a continuing basis.

The actuarial present value of accumulated plan benefits as of January 1, 2024 was as follows (in millions):

| | Ford Motor Company General Retirement Plan | Ford Motor Company UAW Retirement Plan | UAW AAI Retirement Plan | Total (Memorandum Only) |
|---|--|--|-------------------------------|-------------------------------|

Ford Motor Company Defined Benefit Plans
(Ford Motor Company General Retirement Plan,
Ford Motor Company UAW Retirement Plan, and UAW-AAI Retirement Plan)

Notes to Combining Financial Statements

GRP

For the year ended January 1, 2024, the net decrease in the actuarial present value of accumulated plan benefits is primarily from higher benefit payments as the result of an increase in Plan members selecting a lump-sum settlement upon retirement. In addition, the change in actuarial assumption is due primarily to the decrease in interest rate from 5.54% to 5.20%.

UAW Plan

For the year ended January 1, 2024, the net increase in the actuarial present value of accumulated plan benefits related to a change in actuarial assumptions is due primarily to the decrease of the interest rate from 5.50% to 5.15%.

UAW-AAI Plan

For the year ended January 1, 2024, the net increase in the actuarial present value of accumulated plan benefits related to a change in actuarial assumptions is due primarily to the decrease of the interest rate from 5.48% to 5.13%.

6. Investments in Master Trust

The assets in the Master Trust are held in separate investment accounts. The investment accounts are combined into investment pools according to the asset class(es) in which they invest. The Plans each hold ownership interests in the various investment pools that are described below. Investment income and expenses relating to the investment accounts are allocated to the individual Plans based upon the Plan's individual ownership of that associated investment pool. Administrative expenses relating to the Master Trust are allocated to the individual Plans based upon a Plan's total ownership in the Master Trust. See Note 2, *Plan Expenses*, for additional information.

Investment Pools

Equity

Equity investment pools invest in the public stock of U.S. and international companies including those held in commingled funds. The equity investment pools may also contain a limited amount of hedging instruments such as cash and short-term investments, foreign currency swaps and futures, and bonds. The investment objective of the Equity - Passive investment pools is to provide risk-adjusted returns in excess of, or equal to, certain equity index benchmarks.

Fixed Income

Fixed-income investment pools invest in fixed and variable rate bonds of U.S. government and government-sponsored enterprises, bonds of foreign governments, corporate bonds, municipal securities, bank notes, mortgages, and other asset-backed securities including those held in commingled funds. Fixed-income investment pools may also contain derivative holdings such as interest rate futures, options, and swaps (including credit default swaps).

The investment objective of the Fixed Income - Broad investment pool is to provide a risk-adjusted return in excess of a broad government/credit long duration fixed-income benchmark. The investment objectives of the Fixed Income - Credit and Fixed Income - Intermediate Credit

Ford Motor Company Defined Benefit Plans
(Ford Motor Company General Retirement Plan,
Ford Motor Company UAW Retirement Plan, and UAW-AAI Retirement Plan)

Notes to Combining Financial Statements

investment pools are to provide a risk-adjusted returns in excess of credit-only, long-duration, and intermediate-duration fixed-income benchmarks, respectively. The investment objective of the Fixed Income - GRP Completion and the Fixed Income - UAW Completion investment pools is to provide an interest rate hedge that decreases funded status sensitivity to changes in interest rates.

Private Equity

The investment objective of the Private Equity investment pool is to provide a long-term return in excess of a global public equity index benchmark. The Private Equity investment pool invests in buyout funds, venture capital funds, distressed/turnaround funds, secondaries, and special situation funds. The Private Equity investment pool may also temporarily hold public equities due to portfolio companies that have recently been taken public. In addition, the portfolio may contain various private credit investments. These illiquid investments are primarily held in commingled fund-of-fund vehicles or separate accounts. The securities in this investment pool include cash and short-term investments that can be used to facilitate investment redemptions and subscriptions.

Hedge Fund

The investment objective of the Hedge Fund investment pool is to generate long-term returns comparable to the return on public equities but with lower volatility of monthly returns. The Hedge Fund investment pool invests in a diversified portfolio of hedge funds that employ various strategies including event driven, equity long/short, macro/CTA, multi-strategy, and relative value.

Hedge funds generally hold liquid securities such as public equities, exchange-traded derivatives, and fixed-income securities. The securities in this investment pool include cash and short-term investments that can be used to facilitate investment redemptions and subscriptions.

Real Estate

The investment objective of the Real Estate investment pool is to provide a long-term return above public equities with low correlation to other asset classes. The Real Estate investment pool includes core investments (to provide current income returns), opportunistic investments (less liquid funds to provide higher expected returns but with additional risks), and special situation investments. The investment vehicles held by the Real Estate investment pool consist primarily of limited partnerships and private real estate investment trusts. The securities in this investment pool include cash and short-term investments that can be used to facilitate investment redemptions and subscriptions.

Cash

The Cash investment pool contains centralized cash reserves for the operation of the Master Trust including the need to fund participant monthly benefit payments and various Plan expenses. It may also contain a limited amount of securities from recently terminated investment manager accounts.

Derivative Instruments

The Master Trust is party to certain agreements, which are designed to manage exposures to foreign exchange and interest rate risks. The interest rate and foreign currency instruments are used for the purpose of hedging changes in the fair value of assets and the actuarial present value of accumulated plan benefits that result from interest rate changes and currency fluctuations, or as an efficient substitute for traditional securities. Interest rate instruments are also used to adjust

portfolio duration. Derivatives may not be used to leverage or to alter the economic exposure to an asset class outside the scope of the mandate an investment manager has been given. Alternative investment managers are permitted to employ leverage (including through the use of derivatives or other tools) that may alter economic exposure.

The tables below present the fair value of derivative instruments by major type on a gross basis (in millions). The derivatives instruments table reflects all derivative instruments on a gross basis even if the instruments are subject to enforceable master netting arrangements. Gross amounts exclude the effects of counterparty netting and collateral and are not representative of the Master Trust's credit exposure. The tables also present the amounts of counterparty netting and collateral that have the right of offset but have not been offset in the derivatives instruments table (in millions).

Derivatives that are not subject to a master netting or similar arrangement, or derivatives for which an ultimate determination has not been made regarding whether enforceable arrangements exist, are included below as not being subject to a master netting or similar arrangement.

These agreements are treated as financing arrangements and are reflected in the tables presenting information about the Master Trust net assets as part of cash and short-term investments at December 31, 2024 and 2023. Given the short-term nature of these agreements, they are carried at contract amounts reflective of the amounts at which the securities will be subsequently resold or repurchased, as specified in the respective agreements. These agreements are collateralized by high-quality, fixed-income securities.

To mitigate the risk of counterparties not meeting their obligations under the terms of agreements, the Master Trust enters into master netting or similar agreements, and receives both cash and noncash collateral as security for certain derivative instruments and repurchase agreements. The investment managers, on behalf of the Master Trust, manage its foreign currency and interest rate counterparty credit risks by limiting exposure to and by monitoring the financial condition of each counterparty. In the unlikely event that a counterparty fails to meet the terms of a particular instrument, the Master Trust's risk is limited to the fair value of the instrument, offset by any amounts subject to master netting or similar agreements and the value of any collateral held.

The cash and noncash collateral disclosed in the tables above includes only amounts received and pledged that are associated with instruments that have a master netting or similar arrangement. The collateral amounts discussed below include cash and noncash collateral received and pledged

for all instruments, including those that are subject to a master netting or similar arrangement and those that are not.

Cash collateral received, which approximated \$226 million and \$582 million at December 31, 2024 and 2023, respectively, is invested in a segregated account managed by Northern Trust that consists of high-quality, short-term, fixed-income investments. The net assets of the Master Trust reflect a corresponding obligation to return this cash collateral to the counterparties. The noncash collateral received, for which amounts are disclosed in the tables above, if applicable, is not reflected in the net assets of the Master Trust as the Master Trust does not sell or pledge the noncash collateral.

The Master Trust also pledges both cash and non-cash collateral to counterparties as security to mitigate the risk of the Master Trust not meeting obligations under the terms of the derivative instrument agreements. The net assets of the Master Trust reflect, as an asset, collateral pledged by the Master Trust to counterparties.

Cash collateral pledged approximated \$258 million and \$322 million at December 31, 2024 and 2023, respectively. The noncash collateral pledged, which approximated \$2.9 billion and \$3.4 billion at December 31, 2024 and 2023, respectively, remains in the net assets of the Master Trust and is generally invested in short-term investments and fixed-income securities.

Notes to Combining Financial Statements

Fair Value

Accounting standards require certain assets and liabilities be reported at fair value in the combining financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described as follows:

Level 1 - In general, fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Master Trust has the ability to access.

Level 2 - Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and other inputs such as interest rates and yield curves that are observable at commonly quoted intervals. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 - Inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset. See below for significant inputs related to Level 3 investments.

Any investments discussed below as being valued using the net asset value (NAV) per share as a practical expedient have not been classified in the fair value hierarchy.

In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Master Trust's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

Valuation Techniques and Inputs

Equity Investments

Equity investments are generally valued based on quoted market prices and are primarily exchange traded. Securities for which official close or last trade pricing on an active exchange is available are classified as Level 1 in the fair value hierarchy. If closing prices are not available, securities are valued at the last quoted bid price or may be valued using the last available price and typically are categorized as Level 2. Level 3 investments, if any, are often thinly traded or delisted, with unobservable pricing data.

Equity investments are comprised primarily of common and preferred stocks totaling approximately \$1,481 billion and \$1,320 billion at December 31, 2024 and 2023, respectively. The remaining securities are comprised of registered investment companies, publicly traded partnerships, and commingled funds.

Fixed-Income Securities

Fixed-income securities are first valued using quoted market prices if available. If quoted market prices are not available, prices are determined as described below:

Corporate Bonds and Government Securities - Corporate bonds and government securities are valued based on quotes received from independent pricing services or from dealers who make markets in such securities. Pricing services utilize matrix pricing, which considers readily available inputs such as the yield or price of bonds of comparable quality, coupon, maturity, and type, as well as dealer-supplied prices, and generally are categorized as Level 2 inputs in the fair value hierarchy. Government securities include index-linked government bonds that offer a return equal to the original real yield at issuance plus the rate of inflation. Inputs used to value these bonds include the movement in real interest rates and changes in inflation indices. Securities categorized as Level 3, if any, are typically priced by dealers and pricing services that use proprietary pricing models which incorporate unobservable inputs. These inputs primarily consist of yield and credit spread assumptions.

Mortgage-Backed and Other Asset-Backed Securities - Mortgage-backed and other asset-backed securities are also valued based on quotes received from independent pricing services or from dealers who make markets in such securities. Pricing services utilize matrix pricing, which considers prepayment speed assumptions, attributes of the collateral, yield or price of bonds of comparable quality, coupon, maturity, and type, as well as dealer-supplied prices, and generally are categorized as Level 2 inputs in the fair value hierarchy. Securities categorized as Level 3, if any, are typically priced by dealers and pricing services that use proprietary pricing models that incorporate unobservable inputs. These inputs primarily consist of prepayment curves, discount rates, default assumptions, and recovery rates.

Commingled Funds - Fixed-income securities and equity investments may each be combined into commingled fund investments. Commingled equity funds, if any, include investments in common and preferred stock and are valued at the NAV per share multiplied by the number of shares held as of the measurement date. Commingled fixed-income securities primarily include investments in government and corporate bonds and are valued at the NAV per share multiplied by the number of shares held as of the measurement date. The NAV per share is based on the fair value of the underlying net assets. The NAV is corroborated by observable market data, including prices of the

underlying securities and recent transactions in the fund and therefore are categorized as Level 2. Commingled equity and fixed-income securities held by the Master Trust may require redemptions on certain days of the week or month and with prior notice, as stipulated in the underlying investment agreements.

Derivatives - Exchange-traded derivatives for which market quotations are readily available are valued at the last reported sale price or official closing price and are categorized as Level 1. Over-the-counter derivatives typically are valued by independent pricing services and categorized as Level 2. In some cases, Level 2 derivatives are valued utilizing publicly available pricing data of contracts with similar terms. In other cases, the derivatives are valued using current spot market data adjusted for the appropriate current forward curves provided by external financial institutions. Level 3 derivatives, if any, are typically priced by dealers and pricing services that use proprietary pricing models that incorporate unobservable inputs, including extrapolated or model-derived assumptions such as volatilities and yield and credit spread assumptions.

Alternative Investments

Hedge Fund - Hedge funds are valued at the NAV per share (or its equivalent) based on audited financial statements of the funds, where available, with adjustments to account for fund activity and other applicable valuation adjustments. There are inherent restrictions on redemptions that may affect the ability to sell the investment at its NAV in the near term.

Private Equity and Real Estate - Private equity and real estate investments are less liquid. These investments are valued at the NAV per share (or its equivalent) based on audited financial statements of the investments, where available, with adjustments to account for partnership activity and other applicable valuation adjustments. There are inherent restrictions on redemptions that may affect the ability to sell the investment at its NAV in the near term.

Cash and Short-Term Investments

Cash and short-term investments are valued at fair value based on their outstanding balances. Outstanding balances are valued at \$1.00/unit, which approximates fair value. As part of their respective investment strategies, multiple investment pools hold cash and short-term investments.

Other

Other investments include funds held as collateral or in escrow for pending trades, and recoverable taxes. The other investments are valued at the daily closing price as reported by the fund.

The Company has processes in place to select the appropriate valuation techniques and unobservable inputs to perform Level 3 fair value measurements. Processes include meetings with investment managers and reconciliations of manager and trustee records to ensure that techniques and inputs produce valuations within tolerance.

Changes in Fair Value of Level 3 Assets

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another.

Notes to Combining Financial Statements

As of December 31, 2024 and 2023:

- (a) This class represents funds investing primarily in strategies whose focus is the impact of macroeconomic influences on global fixed income, equity, currency, and commodities markets. Positions are often established with derivatives, primarily in the futures market.
- (b) This class represents cash and pending trades. Small amounts of cash are typically held at Fund Trustee due to the timing of hedge fund redemptions and subscriptions.
- (c) This class represents funds investing primarily in long and short positions in publicly traded equity securities or related derivatives. They can be long, short, or neutral-biased with varying amounts of leverage. The investment processes may be fundamental or quantitative. Approximately 7% and 4% in 2024 and 2023, respectively, of the value of the investments in this category are distribution-style funds and considered illiquid.
- (d) This class represents funds investing in two or more of the hedge fund classes. Approximately 4% and 5% in 2024 and 2023, respectively, of the value of investments in this category are distribution-style funds and considered illiquid.
- (e) This class represents funds investing primarily in the securities or related derivatives of companies involved in corporate transactions such as mergers, acquisitions, restructurings, and capital structure changes. Strategies are primarily fundamental. Approximately 24% and 34% in 2024 and 2023, respectively, of the value of investments in this category are distribution-style funds and considered illiquid.
- (f) This class represents funds investing primarily in strategies designed to benefit from changes in pricing discrepancies between related securities. These strategies include but are not limited to capital structure arbitrage, convertible arbitrage, fixed-income arbitrage, statistical arbitrage, and volatility/options arbitrage. Approximately 2% and 7% in 2024 and 2023, respectively, of the value of the investments in this category are distribution-style funds and considered illiquid.
- (g) This class represents investments in core and tactical property funds. Core funds primarily consist of operating and substantially leased institutional quality properties in developed markets. Tactical funds can be value-added or opportunistic and may invest in non-traditional property types, distressed assets, renovation, and development.
- (h) This class represents diversified investments in private equity funds with the following strategies: Buyout (29%), Venture Capital (68%), Mezzanine/Distressed (2%), and Other (1%) for 2024 and Buyout (31%), Venture Capital (65%), Mezzanine/Distressed (3%), and Other (1%) for 2023. Allocations are estimated based on latest available data for managers reflecting December 31, 2024 and 2023 holdings.

Private equity and real estate funds have original terms averaging ten to 13 years and beyond and cannot be redeemed within the fund without the consent of the applicable General Partner. Although it is not probable that such investments will be sold, it is possible to sell the private equity and real estate fund units in the secondary market.

7. Tax Status

GRP

The Internal Revenue Service (IRS) has determined and informed the Company by a letter dated April 24, 2017 that the GRP is designed in accordance with applicable sections of the Internal Revenue Code of 1986, as amended (Code).

UAW Plan

The IRS has determined and informed the Company by a letter dated April 17, 2017 that the UAW Plan is designed in accordance with applicable sections of the Code.

UAW-AAI Plan

The IRS has determined and informed the Company by a letter dated February 16, 2017 that the UAW-AAI Plan was designed in accordance with applicable sections of the Code.

Although the Plans have been amended since receiving their determination letter, the Plan Administrator and the Plans' counsel believe that the Plans are designed, and are currently being operated, in compliance with the applicable requirements of the IRC and, therefore, believe that the Plan is qualified, and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require the Plans' management to evaluate tax positions taken by the Plans and recognize a tax liability if the Plans have taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plans are subject to routine audits by taxing jurisdictions.

8. Related Party and Party-in-Interest Transactions

Northern Trust serves as the trustee and custodian of the Plans. Certain Plan investments are managed by Northern Trust. Alight serves as the Benefit Administrators for the Plan.

State Street Bank and Trust Company is the paying agent on behalf of the Plans. Certain investments of the Plans are managed by State Street Global Advisors, an affiliate of State Street Bank and Trust Company.

Ford Motor Company Defined Benefit Plans
(Ford Motor Company General Retirement Plan,
Ford Motor Company UAW Retirement Plan, and UAW-AAI Retirement Plan)

Notes to Combining Financial Statements

As described in Note 2, the Plans paid certain expenses related to Plan operations and investment activity to various service providers. In addition, the Company pays certain administrative expenses related to the Plans. These transactions are party-in-interest transactions under ERISA.

The Master Trust has investments in Ford's common stock and corporate debt. At December 31, 2024 and 2023, the Master Trust owned 76,058 shares of Ford's common stock with a fair value of approximately \$0.8 million and \$0.9 million, respectively. At December 31, 2024 and 2023, the Master Trust owned various Ford and Ford affiliate corporate bonds with a face value of approximately \$52.7 million and \$40.0 million and a fair value approximately of \$49.0 million and \$35.7 million, respectively.

9. Plan Termination

Although it has not expressed any intention to do so, except as otherwise provided below, the Company has the right under the Plans to discontinue contributions and to terminate each of the Plans subject to the requirements of ERISA and subject to the terms of the present Ford-UAW agreement (as applicable). In the event the GRP, UAW Plan, or UAW-AAI Plan are terminated, the net assets available to provide retirement benefits would be distributed first to provide that portion of each member's accrued benefit derived from employee contributions in excess of any contributory benefits received (GRP only) and then allocated by benefit category in the following order of precedence:

- Life income benefits being paid to former employees (or their beneficiaries) as of three years prior to the termination date and life income benefits that would have been payable to employees (or their beneficiaries) who were eligible to retire as of three years prior to the termination date. This category is limited to the lowest benefit that would have been payable during the five years prior to the termination date.
- Other benefits that are nonforfeitable and are insured by the PBGC determined without regard to the dollar limitation. This category includes a five-year phase-in of benefit increases, which would have been excluded under the prior category.
- All other nonforfeitable benefits, including benefit increases, which would have been excluded from the prior categories.
- All other benefits payable under the terminated Plan.

After satisfaction of all plan liabilities, any residual assets may be distributed to the Company.

Generally, the PBGC guarantees most vested normal retirement benefits, early retirement benefits (up to the amount accrued for normal retirement), and certain disability and survivor's benefits; however, the PBGC does not guarantee all types of benefits under the Plans, and the amount of benefit protection is subject to phase-in and dollar limitations. If benefits have been increased within five years prior to plan termination, the benefit increases may not be guaranteed.

Whether all participants receive their benefits should either Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations, and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

| • Third segment rate | 5.59% | 4.52% |
| • Effective interest rate | 5.08% | 4.41% |

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

Rates not reflecting stabilization are used to determine PBGC variable rate premiums if the alternative method is used, and are used to determine the PBGC FTAP and the PBGC 4010 FS.

Benefit commencement date

- Preretirement death benefit The later of the death of the active participant or the date the participant would have attained the earlier of age 55 with 10 years of service, 30 years of service or normal retirement date, assuming separation on the date of death.
- Deferred vested benefit The later of age 62 or termination of employment.
- Disability benefit Upon disablement.
- Retirement benefit Upon retirement. Participants that are eligible for an ESAP benefit are assumed to defer commencement of their GRP benefit until age 65.

Form of payment

50% of single males and 60% of single females elect life annuity, and 50% of single males and 40% of single females elect a lump sum.
50% of married males and 40% of married females elect the lump sum, 45% of married male and 55% of married female participants elect the 65% surviving spouse benefit; otherwise life annuity

Percent married

91% of males; 50% of females.

Spouse age

Wife three years younger than husband participant; husband two years older than wife participant.

Covered pay

The annualized base salary as of December 31, 2023.

Administrative expenses

Target normal cost increased by the prior year's administrative expenses. At the direction of the plan sponsor, no loading for investment expenses is included.

Loads

A 7% load is applied to liabilities for deferred vested participants as an estimate of the value of the contingent annuitant pop-up provision.

Additional assumptions

- Suspended participants are assumed to not return to work. If service bridging enables retirement eligibility, benefits are assumed to begin at earliest possible commencement.
- Benefit class code D is assumed for active participants with missing data.

At-risk assumptions

For at-risk calculations, all employed and terminated vested participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year. In addition, these participants are assumed to elect the most valuable form of benefit available in the plan. For the current plan year, the plan's at-risk transition percentage is 0% for minimum funding purposes and 100% for maximum deductible purposes.

At-risk funding target loaded 4% of ongoing funding target plus \$700 per participant. At-risk target normal cost loaded 4% of ongoing target normal cost. For the current plan year, the plan's at-risk load transition percentage is 0% for minimum funding purposes and 100% for maximum deductible purposes.

Timing of benefit payments

Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

| | |
|---------------------------------|--|
| Valuation date | First day of plan year |
| Funding target | Present value of accrued benefits as required by regulations under IRC §430. |
| (1) Early retirement supplement | Gross amount allocated over service to decrement. |
| (2) Other supplements | Allocated over service to decrement. |
| (3) Other benefits | Benefit function as applied to accrued benefit. |
| Target normal cost | Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430. |
| Decrement timing | The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.

Actuarial value of assets for determining minimum required contributions

The actuarial value of assets is equal to the market value of assets as of the valuation date plus the discounted present value of contributions made after the valuation date for the prior plan year, discounted using the effective interest rate for the prior plan year.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued. WTW has reviewed the plan provisions with Ford Motor Company and, based on that review, is not aware of any significant benefits required to be valued that were not.

The plan pays small benefits (with a present value up to \$5,000) in a single lump sum payment. Such lump sums are not explicitly valued; rather such participants' benefits are valued using the benefit choice assumptions described above.

Data Sources

Ford Motor Company, through its third party administrator, furnished participant data as of January 1, 2024. Information on assets, contributions, and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. In consultation with Ford Motor Company, assumptions were made for missing or apparently inconsistent data elements. The documentation for these assumptions can be found in the folder labeled "2024 Ford Pension Data Files" within the Files From Towers Watson path on Ford's sharepoint site.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

| | |
|---|--|
| Discount rate | The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time. |
| Cash Balance Interest crediting rate | The plan credits interest to cash balance accounts using the 30-year Treasury rate, but with a minimum interest credit rate of 4.00%. Our long-term estimate of the interest crediting rate is based on a combination of current conditions and past conditions, including the relationship between the 30-year Treasury rate and high-quality corporate bond yields. |
| | Based on analysis of historical relationships between 30-year Treasury rates and the discount rate used for corporate accounting purposes (based on high-quality corporate bond yields), we have set the assumed interest crediting rate to be the UAW-AAI Retirement Plan's discount rate used for corporate accounting purposes less 100 basis points (subject to the plan's minimum interest crediting rate of 4.00%); however, the result of this process is reviewed each year for reasonableness given current and expected future conditions. |
| Lump sum conversion rate | As required by IRC §430, lump sum benefits for are valued using "annuity substitution", so that the interest rates assumed are effectively the same as described above for the discount rate. |
| Rates of increase in: | |
| • Compensation | Assumed increases were chosen by the plan sponsor and they represent an estimate of future experience. |
| • Rates of increase in Social Security, Wage base and CPI | Assumed increases were chosen by the plan sponsor and they represent an estimate of future experience. |
| • Participant contributions | Only participants that have contributed to the pension plan in the past are expected to contribute in future years. The level of contributions is expected to increase at the same rate as the assumed rate of increase in compensation. |
| Plan-related expenses | As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, |

Assumptions Rationale - Significant Demographic Assumptions

| | |
|--|---|
| Healthy Mortality | The substitute mortality rates were developed based on actual plan experience and were approved by the IRS to be used for funding purposes. |
| Disabled Mortality | Assumptions used for funding purposes are prescribed by IRC §430(h). |
| Termination | Termination rates were based on an experience study conducted in 2022 based on experience from 2016 through 2020, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future. |
| Disability | Disability rates were based on an experience study conducted in 2022 based on experience from 2016 through 2020, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future. |
| Retirement | Retirement rates were based on an experience study conducted in 2022 based on experience from 2016 through 2020, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future. Assumed retirement rates differ by years of benefit service because of observed differences in retirement rates before and after 30 years of benefit service (due to 30-year eligibility requirement for increased plan subsidies) |
| Benefit commencement date for deferred benefits | <ul style="list-style-type: none">• Preretirement death benefit Surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer. Because the benefits include a subsidy for early commencement it is assumed that spouses will not elect to defer which is the plan sponsor's best estimate of future experience.• Deferred vested benefit Deferred vested participants' assumed commencement age is a single age based on the results of an experience study conducted in |

2012 based on observed experience from 2006 through 2011. This is the plan sponsor's best estimate of future experience. A second study was conducted in 2017 based on experience from 2011 through 2016 and this second study did not support a change in the assumption.

Form of payment

The percentage of retiring participants assumed to take lump sums and single and joint and survivor annuities, and the assumed survivor percentages, are based on observed experience over the period 2016 through 2020. This is the plan sponsor's best estimate of future experience.

Percent married

The assumed percentage married is based on the percentage married observed among retired participants in 2012 and is the plan sponsor's best estimate of future experience. A second study was conducted in 2017 based on experience from 2011 through 2016 and this second study did not support a change in the assumption.

Spouse age

The assumed spouse age is based on the difference in ages among married participants observed among retired participants from 2016 through 2020 and is the plan sponsor's best estimate of future experience.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation

The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC §430.

beginning with the 2024 plan year, along with updated mortality improvement rates provided by the IRS for 2024 plan years.

The assumed cash balance interest crediting rate was updated from 5.00% to 4.13%.

The compensation increase assumption was increased 35 basis points at each age.

The assumed plan-related expenses added to the target normal cost were changed from \$13,813,307 for the prior valuation to \$11,344,350 for the current valuation to account for lower expected expenses to be paid from the trust.

Schedule SB, Part V Summary of Plan Provisions

Plan Provisions - General Retirement Plan (Excluding APMSI Benefits, Environ Benefits, PRIMUS Benefits, AAI Benefits, and Benefits for Participants Represented by the IAM and IBEW)

The following is an outline of the principal provisions applicable in the current plan year, which formed the basis for this actuarial valuation.

Plan Participation

| | |
|---------------------------|---|
| Covered employees | The plan applies to employees not covered by any other private retirement plan to which the Company contributes. Employees covered by a collective bargaining agreement are only covered by this plan if specifically negotiated. Employees hired after December 31, 1975 must have completed three months of service to be participants in the Plan (pre-participation service is credited for non-contributory benefit eligibility and accrual). All participants participate in the non-contributory segment of the Plan. A participant may elect to be a contributory participant by making monthly contributions. Participation is frozen effective December 31, 2003 except for collectively bargained units. Employment of an Hourly-rated employee represented by the IAM or IBEW hired or rehired by the Company on or after October 24, 2011, shall not be eligible to participate in the Plan with respect to service after such date. |
| Participation Date | For Hourly employees, date of hire, if hired prior to October 24, 2011. For all other employees, participation was frozen as of December 31, 2003. |

Definitions

| | |
|-------------------------|---|
| Vesting service | One year of service for each plan year with more than 750 hours. |
| Freeze Date | The freeze date is the date on which a participant attains their 35th year of Credited Service (including Credited Service from a prior plan) but not before December 31, 2019. This freeze date will apply to the pay and service used to calculate a participant's accrued benefit. |
| Credited service | For regular, full-time salaried employees, one year of service for each plan year with more than 10 months of employment. Fractional credit is provided if less than 10 months of employment, at a rate of 1/10 th of a year per month. |

Plan Name: General Retirement Plan

SCHEDULE SB ATTACHMENTS

| | |
|-------------------------------------|---|
| | For supplemental and hourly employees, one year of service for each plan year with more than 1,615 hours. Fractional credit is provided if less than 1,615 hours of service, based on the number of hours of service divided by 1,700, rounded to the nearest 1/10 th of a year. |
| | Foundry service - For every year of service between 10.1 and 25, an additional service amount is added equal to 33.3% of the regular service added. For every year of service above 25, an additional service amount is added equal to 20% of the regular service added. |
| | A participant's Credited Service will not increase after the participant reaches their Freeze Date. |
| Contributory service | The sum of credited service while making contributions and past service credits in excess of two years for members who contributed at any time prior to January 1, 1981. |
| Waiting period service | If a member makes contributions at all times eligible to do so prior to becoming eligible for a vested benefit, the period between employment and membership. Different rules apply prior to 1996. |
| Pensionable pay | Base salary paid on December 31. A participant's Pensionable Pay after the their Freeze Date will not be reflected. |
| Final average monthly salary | The highest average monthly base salary paid to an employee as of any five consecutive December 31 dates that occur when the employee is making contributions during the 120 consecutive months ending with the last month that the employee makes contributions. |
| Covered compensation | Average of the Social Security Wage Base for the preceding 35 years rounded to the nearest multiple of \$600. |
| Breakpoint | 150% of covered compensation for an individual attaining age 65 during the plan year. |
| Normal retirement date (NRD) | First of month coinciding with or next following the attainment of age 65. |

Eligibility for Benefits

| | |
|------------------------------------|---|
| Normal retirement | Retirement on NRD. |
| Regular early retirement | Retirement before NRD and on or after both attaining age 55 and completing ten years of credited service or completing at least 30 years of credited service. |
| Special early retirement | Age 55 with 10 years of credited service under mutually satisfactory conditions or upon reaching age 55 if age 50 with 10 years of credited service under mutually satisfactory conditions. |
| Postponed retirement | Retirement after NRD. |
| Vested termination | Termination for reasons other than death or retirement after completing five years of vesting service or five years of credited service. |
| Disability | Permanent and total disability prior to NRD after attaining ten years of credited service. |
| Preretirement death benefit | Death while eligible for normal, early, postponed, or deferred vested retirement benefits, with a surviving spouse. |

Benefits Paid Upon the Following Events

| | |
|---------------------------------|--|
| Normal retirement | Monthly pension benefit determined as of NRD. |
| Regular early retirement | A percentage of the normal retirement benefit based on the age at benefit commencement. Percentages for selected ages are: |

| Age | Contributory | | |
|------------|------------------------------|--------------------------|--------------------------------|
| | Non- Contributory | except Part B | Contributory Part B |
| 45 | 0.261 | 0.433 | 0.175 |
| 50 | 0.383 | 0.600 | 0.312 |
| 55 | 0.579 | 0.767 | 0.486 |
| 60 | 0.867 | 0.933 | 0.692 |
| 62 | 1.000 | 1.000 | 0.769 |
| 65 | 1.000 | 1.000 | 1.000 |

The non-contributory percentage is increased to 100% when age 62 and one month is reached, if retired with either 30 years of credited service or with age plus credited service of 85 or more.

The non-contributory early retirement benefit is not reduced below the level that would cause the early retirement supplement to exceed the employee's unreduced Social Security benefit.

| 10/1/08 – 9/30/09 | 51.00 | 1,530 |
| 10/1/09 – 9/30/10 | 51.20 | 1,536 |
| On or after 10/1/10 | 51.40 | 1,542 |

Contributory: Life benefit same as normal retirement benefit except that Part B contributory benefit is reduced as for regular early retirement.

Postponed retirement Monthly pension benefit determined as of actual retirement date.

Vested termination Normal retirement benefit payable at age 65 based on accrued contributory benefit and non-contributory rate in effect at time of service break or a reduced benefit payable as early as age 55 using the following reduction factors:

| <u>Age</u> | <u>Non-Contributory Flat Rate</u> | <u>Contributory except Part B</u> | <u>Contributory Part B</u> |
|------------|-----------------------------------|-----------------------------------|----------------------------|
| 55 | 0.425 | 0.425 | 0.425 |
| 60 | 0.667 | 0.667 | 0.667 |
| 65 | 1.000 | 1.000 | 1.000 |

Disability Same as special early retirement, unless participant qualifies for Social Security disability benefit, in which case the Part B benefit is unreduced and the Supplement is not payable.

Preretirement death

- Before early retirement eligibility 50% of the life benefit that would have been payable to the participant had he terminated on the date of death, and commenced with reductions for early commencement.
- After early retirement eligibility 65% of the life benefit that would have been payable to the participant without reduction for early retirement, but with reduction for the form of benefit (5% reduction plus additional adjustments for age difference between the participant and spouse).

Supplemental Retirement Benefits

Early retirement supplement

- Eligibility At least 30 years of credited service.
- Benefit For retirement on or after October 1, 2003, the amount below, payable monthly to age 62 and one month, reduced by the amount of the regular early retirement benefit (assuming the participant's service is all non-contributory). Certain retirees will continue to receive a supplement until the age at which 80% of the unreduced Social Security benefit is payable.

| <u>Retirement Date</u> | <u>Floor</u> |
|-------------------------|--------------|
| 10/1/06 through 9/30/07 | 3,020 |
| 10/1/07 through 9/30/08 | 3,140 |
| 10/1/08 through 9/30/09 | 3,150 |
| 10/1/09 through 9/30/10 | 3,160 |
| On or after 10/1/10 | 3,170 |

A maximum on the amount of the non-contributory early retirement benefit plus the supplement may be applied which would limit the amount of the supplement. The maximum is equal to 80% of final monthly base pay.

| Refund of participant contributions | Accumulated contributions with interest at death before retirement if no other contributory death benefit payable under the Plan. Modified cash refund on death after retirement or after survivor's death. Upon withdrawal of accumulated contributions with interest, a non-vested participant forfeits his accrued contributory benefit and a vested participant forfeits only that part of the benefit attributable to his contributions. A non-vested participant has limited opportunity to pay back amounts withdrawn including interest to restore forfeited benefits. |
| Pension increases | None. |
| Plan participants' contributions | Contributory participants make contributions equal to 1.5% of monthly base salary. All other costs of the plan are met by the Company. |
| Bulk lump sum offering | In 2012 and 2013, all terminated vested and inpay participants were offered the opportunity to elect a lump sum payment equal to the present value of benefits earned. Participants also had the option to elect an annuity form of payment. Similar to the lump sum opportunity described above, Ford made a similar offer in 2020 which was limited to only terminated vested participants. |
| Maximum on benefits and pay | All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. |

Plan Provisions for APMSI Benefits

The following is an outline of the principal provisions applicable in the current plan year, which formed the basis for this actuarial valuation.

Plan Participation

| | |
|---------------------------|---|
| Covered employees | An employee who is covered under the Collective Bargaining Agreement related to APMSI. |
| | Effective May 25, 2001 and August 3, 2001, the Chicago and Atlanta facilities, respectively, were closed. There are no active participants in the plan. |
| Participation date | Date of hire. |

Definitions

| | |
|-------------------------------------|---|
| Vesting service | One year in which an employee completed at least 1,000 hours of service. No vesting service is granted before December 18, 1986, and no vesting service is granted before January 1, 1991 prior to a break in seniority. |
| Pension service | One year in which an employee completed at least 1,750 hours of service. Partial years of service are granted and calculated by multiplying one year of credited service by actual hours worked divided by 1,750. No pension service is granted before December 18, 1986, and no pension service before January 1, 1991 is granted prior to a break in seniority. |
| Pensionable pay | N/A |
| Average earnings | N/A |
| Social Security benefit | N/A |
| Normal retirement date (NRD) | Age 65 with one year of vesting service. |
| Monthly pension benefit | A monthly life benefit per year of pension service. For employees who retired or terminated on or after January 1, 2000 the monthly life benefit equals twelve dollars times the years of pension service. For employees who (i) terminated employment on the date the facility is permanently closed and (ii) who did not immediately transfer to a related employer, the monthly life benefit equals fourteen dollars times the years of pension service. |

Eligibility for Benefits

Normal retirement

Retirement on NRD.

Early retirement

Retirement before NRD and on or after attaining age 55 with 10 years of vesting service.

For participants with 15 years of vesting service, early retirement eligibility is as early as when the sum of the participant's age and vesting service total at least 85.

The early retirement date shall also be age 55 for participants who meet the following requirements:

- At least age 45 on November 30, 2000;
- If an hourly employee, actively employed on November 30, 2000;
- If a salaried employee, either actively employed on November 9, 2000, or on approved leave of absence from employment on November 30, 2000;
- At least 10 years of vesting service on November 30, 2000;
- If a salaried employee, eligible to participate in the Environ Separation Program and completes all the required forms in timely fashion;
- If an hourly employee, covered by the Plant Closing Agreement and makes a timely election to receive benefits.

Postponed retirement

Retirement after NRD.

Vested termination

Termination for reasons other than death or retirement after completing five years of vesting service. All participants employed at any time during 2000 are vested in their pension benefit.

Disability

Participant must provide proof of disability, been disabled for a period of at least six months, and completed ten years of pension service.

Preretirement death benefit Death while eligible for normal, early, postponed, or deferred vested retirement benefits, with a surviving spouse.

Benefits Paid Upon the Following Events

Normal retirement Monthly pension benefit determined as of NRD.

Early retirement Monthly pension benefit determined as of early retirement date, reduced 5/9 of 1% for each month of payment before age 65 (62 if at least 15 years of pension service).

For participants with at least 15 years of pension service and the sum of age and pension service totaling at least 85, unreduced benefits begin at age 62 and are reduced 5/9 of 1% for each month before age 62. Benefit becomes unreduced at age 62.

Postponed retirement Monthly pension benefit determined as of actual retirement date.

Vested termination Monthly pension benefit determined as of termination date, reduced 5/9 of 1% for each month that payment precedes the participant's NRD.

Disablement Monthly pension benefit determined as of the date of disablement, payable immediately without reduction for early commencement continuing until the earliest of date of death, ERD, NRD or recovery date.

Preretirement death 60% (50% for deaths prior to 10/1/99 and for participants not eligible to retire at death) of the monthly pension benefit as of the date of death, reduced 5% for spouse age difference (plus/minus 0.5% for each year the spouse age difference is greater than 5) and reduced further for early commencement, if applicable.

Other Plan Provisions

Forms of payment The normal annuity form for a single participant is a life annuity.

The normal annuity form for a married participant is a 60% joint and survivor annuity (50% if benefit commencement occurred prior to October 1, 1999), reduced by 5% (with additional adjustment of +/- 0.5% per year if spouse age difference is greater than +/- 5 years).

Married participants can elect the normal annuity form for single participants with spousal consent.

Plan Provisions for PRIMUS Benefits

The following is an outline of the principal provisions applicable in the current plan year, which formed the basis for this actuarial valuation.

Plan Participation

| | |
|---------------------------|---|
| Covered employees | Salaried employees who have been employed by PRIMUS Automotive Financial Services, Inc. for a period of at least one year, measured from date of hire, become participants on the first of the month following the attainment of age 21 with at least one year of Eligibility Service. Employees who do not meet these requirements on or before December 31, 1999 are not eligible to participate in the plan. |
| Participation date | Date of becoming a covered employee. |

Definition

| | |
|--|--|
| Vesting Service / Eligibility Service | An employee receives one year of vesting service and eligibility service for each calendar year during which he or she completes at least 750 Hours of Service. A year of eligibility service is also earned during the first 12 months of employment if the employee completed 750 Hours of Service during that period. Hours of service earned while employed by Marine Midland Bank, Primus Automotive Financial Services, Ford Motor Company or any subsidiary thereof are counted for purposes of determining vesting service and eligibility service. |
| Credited Service | Credited service is calculated on an elapsed time basis from date of hire to date of separation from service, rounded to the nearest 1/12 th of a year. Credited service is earned while employed by PRIMUS Automotive Financial Services or by Marine Midland Bank, provided that the employee was actively employed by Marine Midland Bank immediately prior to the sale and by PRIMUS immediately following the sale. However, the employee does not receive Credited Service for periods of employment with Ford Motor Company or any of its subsidiaries (other than PRIMUS). No credited service is earned on or after January 1, 2000. |

| MR | 9-10 | 6 | 5.0% |
| MR (Branch Manager) | 9-10 | 6 | 7.5% |
| GSR | 1-8 | N/A | 3.0% |
| Final average compensation | Average of the highest five consecutive calendar years of Compensation within the ten calendar years immediately preceding termination of employment. | | |
| Social Security covered compensation | The average of the Social Security taxable wage bases in effect for each calendar year during the 35-year period ending with the last day of the calendar year in which the participant attains his Social Security retirement age. | | |
| Normal retirement date | First of month coinciding with or next following the attainment of age 65 with one year of vesting service. | | |
| Accrued benefit | A benefit payable in the form of a single life annuity and calculated as follows: (a) + (b) – (c), where (a) Base Piece = 1.1% x final average compensation x credited service up to a maximum of 35 years (b) Excess Piece = 0.5% x (final average compensation minus covered compensation, but not less than zero) x credited service up to a maximum of 35 years (c) Offset = accrued benefit earned under the Marine Midland Plan as of December 15, 1990 | | |

Plan Provisions for AAI Benefits

The following is an outline of the principal provisions applicable in the current plan year, which formed the basis for this actuarial valuation.

Plan Participation

| | |
|---------------------------|---|
| Covered employees | AAI Services salaried employees who became members before January 1, 1998. |
| Participation date | First day of the plan year in which a covered employee completed at least 1,000 hours of service during the earlier of a Plan Year (calendar year) or the 12 consecutive month period following date of hire. |

Definition

| | |
|-------------------------------------|---|
| Vesting service | One year of service for each calendar year with at least 1,000 hours. Vesting service continues while actively employed under the General Retirement Plan (GRP). |
| Pension service | One year of service for each calendar year with at least 1,000 hours. Pension service is frozen as of January 1, 1998. |
| Pensionable earnings | Base pay plus bonus paid for the plan year. |
| Average earnings | N/A |
| Social Security benefit | The Social Security wage base for a year, multiplied by (in the first and last years of membership) the ratio of a member's full calendar months of employment in the year divided by 12. |
| Normal retirement date (NRD) | First of month coinciding with or next following the attainment of age 65. |
| Cash balance account | Prior to January 1, 1998, credits were made to the member's cash balance account at the end of each year equal to the present value of an annual benefit based on: <ol style="list-style-type: none">i. 1.2765% of pensionable earnings for the year, plusii. 0.4706% of pensionable earnings above $\frac{1}{2}$ of the year's Social Security wage base This present value equaled the annuity value at age 65 of the above formula, using the UP84 mortality table and an interest rate of 8% discounted back to the applicable year-end at an interest rate of 4% |

Interest credits are also allocated to each member's cash balance account each plan year. The interest credit is made at the end of the plan year and is determined by multiplying the member's account balance at the end of the prior plan year by the greater of 4% and the average yield on 30-year Treasury constant maturities for the plan year. The interest credit rate for the portion of the cash balance account attributable to the additional percentage of earnings in excess of ½ of the Social Security wage base is 4%. Partial year interest credits are granted in the year distributions commence.

| | |
|------------------------|---|
| Accrued Benefit | The accrued benefit is determined by projecting the cash balance account to age 65, if necessary, at an interest rate of 4%, and dividing the projected balance by an annuity factor based on the UP 84 mortality and an interest factor of 8%. |

Plan Provisions for Participants Represented by the IAM and IBEW

The following is an outline of the principal provisions applicable in the current plan year, which formed the basis for this actuarial valuation.

Plan Participants

| | |
|---------------------------|--|
| Covered employees | Hourly-rated employees covered by the Collective Bargaining Agreement (CBA) between the Company and the IAM or IBEW and included in the Contract Unit described in that agreement. The plan was closed to new entrants as of October 24, 2011. |
| Participation date | Date of hire, if hired prior to October 24, 2011. |

Definitions

| | |
|-------------------------------------|--|
| Vesting service | One year of service for each plan year with more than 750 hours of service. Fractional credit is provided if less than 750 hours of service. |
| Credited service | One year of service for each plan year with more than 1,615 hours. Fractional credit is provided if less than 1,615 hours of service, based on the number of hours of service divided by 1,700, rounded to the nearest 1/10 th of a year. Foundry service - For every year of service between 10.1 and 25, an additional service amount is added equal to 33.3% of the regular service added. For every year of service above 25, an additional service amount is added equal to 20% of the regular service added. |
| Normal retirement date (NRD) | First of month coinciding with or next following the attainment of age 65. |

Benefits Paid Upon the Following Events

| | |
|--------------------------|--|
| Normal retirement | Pension benefit determined as of NRD. |
| Early retirement | A percentage of the normal retirement benefit based on the age at benefit commencement. Percentages for selected ages are: |

| <u>Age</u> | <u>Factor</u> |
|------------|---------------|
| 42 | 0.210 |
| 45 | 0.261 |
| 50 | 0.383 |
| 55 | 0.579 |
| 60 | 0.867 |
| 62 | 1.000 |

The percentage is increased to 100% when age 62 and one month is reached, if retired with either 30 years of credited service or with age plus credited service of 85 or more. The early retirement benefit is not reduced below the level that would cause the early retirement supplement to exceed the employee's unreduced Social Security benefit.

| | |
|---------------------------------|--|
| Special early retirement | Life benefit same as normal retirement benefit plus temporary benefit to age 62 and one month if unreduced Social Security is not payable. Certain retirees will continue to receive the temporary benefit until the age that 80% of the unreduced Social Security benefit is payable. |
|---------------------------------|--|

| <u>Retirement Date</u> | <u>Monthly Temporary Benefit Per Year of Credited Service</u> | <u>Maximum Monthly Benefit</u> |
|------------------------|---|--------------------------------|
| 10/1/06 – 9/30/07 | 49.80 | 1,494 |
| 10/1/07 – 9/30/08 | 50.80 | 1,524 |
| 10/1/08 – 9/30/09 | 51.00 | 1,530 |
| 10/1/09 – 9/30/10 | 51.20 | 1,536 |
| On or after 10/1/10 | 51.40 | 1,542 |

| | |
|-----------------------------|--|
| Postponed retirement | Pension benefit determined as of actual retirement date. |
|-----------------------------|--|

| | |
|---------------------------|--|
| Vested termination | Normal benefit payable at age 65 based on rate in effect at time of seniority break or a reduced benefit payable as early as age 55 using the following reduction factors: |
|---------------------------|--|

| <u>Age</u> | <u>Factor</u> |

Disablement Same as early retirement.

Preretirement death

- Before early retirement eligibility 50% of the life benefit that would have been payable to the participant had he terminated on the date of death and commenced with reductions for early commencement and age differences between the participant and the spouse.
- After early retirement eligibility 65% of the life benefit that would have been payable to the participant with the appropriate reduction for early retirement, assuming early retirement would have occurred at the later of age 62 and age at death and for the form of benefit (5% reduction plus additional adjustments for age difference between the participant and spouse).
- Special disability death benefit 50% of the reduced life income benefit payable for the lifetime of the spouse. The participant's life income benefit is reduced prior to age 55 for this coverage. After age 55, the unreduced life income benefit is restored. This benefit is not explicitly valued in the valuation.

Supplemental Retirement Benefits

Early retirement supplement (30 and out)

- Eligibility At least 30 years of service.
- Benefit The amount below, payable monthly to age 62 and one month, reduced by the amount of the regular early retirement benefit. Certain retirees will continue to receive a supplement until the age at which 80% of the unreduced Social Security benefit is payable.

| <u>Retirement Date</u> | <u>Floor</u> |
|-------------------------|--------------|
| 10/1/06 through 9/30/07 | 3,020 |
| 10/1/07 through 9/30/08 | 3,140 |

Schedule SB, Line 24 Change in Actuarial Assumptions

The interest rates used to convert an annuity to a lump sum form of payment was updated to the segment interest rates used to determine the January 1, 2024 funding target.

The assumed plan-related expenses added to the target normal cost were changed from \$13,813,307 for the prior valuation to \$11,344,350 for the current valuation to account for lower expected expenses to be paid from the trust.

The salary increase assumptions was increased 35 basis points at each age.

The assumed cash balance interest crediting rate was updated from 5.00% to 4.13%.

The valuation reflects the updated “substitute mortality table” approved by the IRS under Revenue Procedure 2017-55 to be used beginning with the 2024 plan year, along with updated mortality improvement rates provided by the IRS for 2024 plan years.
